

## BriteShare: Move Up to Customized, Secure File Sharing

To leverage the power of all your data, you need a way to securely share business-critical information internally and with external contacts. Your business success depends on it.

With the BriteShare secure file-sharing service, your team can confidently share information with each other, customers, partners, and suppliers — wherever they are. They can access and deliver information on demand, from the office, or on the road to keep your business one step ahead of the market.

### Increase Productivity, Reduce IT Costs

BriteShare provides employees with a full-featured file-sharing service they can rely on. This eliminates the need for employees to waste time searching for and struggling to use public cloud services or creating independent internal services that may be vulnerable to cyberattacks. It also significantly reduces the hours your IT team will spend tracking, managing, and auditing rogue IT issues and daily file-sharing processes.

### Control and Customize Data Sharing

BriteShare delivers these benefits by combining the best features of public and private file-sharing services. You get the same flexibility and ease of use that public file-sharing services offer, but within the confines of a secure enterprise IT infrastructure. This highly secure file-sharing service is easy to deploy, use, manage, monitor, and audit. In addition, you can customize the service to fit your business goals and processes with a variety of sharing features.

### Leverage a Unique Cloud Architecture

The flexibility offered with BriteShare is enabled by BriteSky's unique Portable On-Demand Data Center (PODD) cloud architecture. The modular PODD architecture incorporates the most advanced cloud networking hardware and software available to provide the highest levels of flexibility and security possible in a cloud environment. It offers complete control over the storage, management, and sharing of large volumes of active, passive, and unstructured data.

## PRODUCT BRIEF

### Get Full-Featured File Sharing

BriteShare offers full-featured file sharing engineered to:

- **Protect business intelligence** with the highest security standards and protocols available for cloud-based networking and computing for all of your file-sharing activities.
- **Reduce business risks** with a data recovery feature that allows you to restore deleted files within a pre-set period of time.
- **Improve productivity and collaboration** with file versioning, which allows multiple versions of the same file to exist in the cloud.
- **Increase efficiency** with data analytics tools that provide insight into how your shared files are being used in the cloud.

## Trust a Secure Sharing Environment

BriteSky PODDs are built with the same level of cloud-based security used by banks, governments, and major credit card companies around the world to create private cloud infrastructures.

All BriteSky PODDs comply with Service Organization Control 2 (SOC 2) requirements for security, availability, processing integrity, confidentiality, and privacy for technology and cloud computing companies.

## Maintain Data Sovereignty

With BriteShare, you can also rest assured that your data will stay in Canada. BriteSky enterprise cloud solutions provide organizations in Canada with complete data sovereignty. All data remains on Canadian soil in PODDs located in BriteSky's Canadian data centers.

Additionally, your data remains yours — fully secured from data mining. You always retain all rights and controls.

## Simplify Your Move to the Cloud

At BriteSky, enterprise cloud provisioning is not a sideline. It's our singular focus. Our enterprise cloud solutions and services are engineered and architected specifically for the unique information technology needs of medium and large enterprises. All BriteSky enterprise clouds are built using best-of-breed technology by a team of highly skilled and dedicated engineers with decades of real-world data center experience and expertise. They are structured to provide the most flexible, cost-effective, and secure enterprise cloud services and solutions for Canadian businesses.

Simplify your move to the cloud. Partner with BriteSky.
