

# GET DEFENSE-IN-DEPTH SECURITY

Advance your security environment beyond point solutions, band-aid protection tactics, and standard security processes with BriteSky Cybersecurity products and solutions.

Our comprehensive and fully integrated cybersecurity offerings deliver scalable, defense-in-depth security for business-critical networks, applications, and data wherever they are — on premises or in public, private, and hybrid clouds.

With BriteSky Cybersecurity, you have everything needed to move from low-visibility cyberdefense systems to:

- Proactive identification of all known vulnerabilities on your network
- Deeper insight through visibility of network traffic and behaviors
- Real-time monitoring, detection, and analysis of suspicious and malicious traffic

## Take a Holistic Approach to Cybersecurity

Our cybersecurity offerings integrate leading-edge cyberdefense tactics, techniques, and procedures with best-in-class tools and technologies. They also incorporate standards such as the Mitre ATT&CK framework and the Cyber Kill Chain to simplify identification and classification of detected anomalies.

Together, these next-generation security capabilities give your business a balanced security posture. They also improve your understanding of the risks posed by security incidents.

BriteSky Cybersecurity integrates holistic, defense-in-depth security measures across your enterprise. This all-encompassing approach makes it easier to apply comprehensive security solution policies for infrastructure and data across multiple complex network architectures.

## Enhance Your Security Posture and Maturity

With BriteSky managed security services, you have the flexibility to continuously evolve your cybersecurity posture and maturity level. You can address ever-changing business needs and cyberthreats while maintaining the same high-quality risk detection and attack mitigation used by banks, governments, and major credit card companies around the world.

## Trust a Complete Solution

BriteSky Fortress is the heart of our cybersecurity offerings. This unique, modular solution can be rapidly deployed through a single BriteSky Lightweight Appliance (BLA) that allows you to adopt any of our enterprise-grade, managed security services with minimal setup, including:

- **BriteSky Detect** for endpoint telemetry
- **BriteSky Indicate** for threat intelligence
- **BriteSky Protect** for managed firewall services
- **BriteSky Recon** for vulnerability management
- **BriteSky Respond** for Security, Orchestration, and Automated Response (SOAR)
- **BriteSky Surveil** for managed Security Information and Event Management (SIEM) on premises or in the cloud for SIEM as a Service (SIEMaaS)

You can choose any of our managed security services as a standalone product. You can also combine our managed cybersecurity offerings with customized **BriteSky Cloud** offerings to create a high-security enterprise cloud environment.

*Our managed cybersecurity services provide Canadian enterprises with data residency and data sovereignty.*

The path you choose depends on your unique requirements. Our cybersecurity offerings provide:

- Foundational security services to establish a security posture from the ground up
- Additional layers of managed security for existing programs
- A practical roadmap for migration from any maturity level to a fully integrated, highly secure environment

## Streamline Security Operations

All BriteSky Cybersecurity offerings include managed compute, software, and security services.

Pricing is based on the features, function, and services you choose. This clear and predictable approach to pricing eliminates the bloated costs associated with generic, one-size-fits-all security solutions where you may be paying for capabilities you don't use.

You can rapidly deploy advanced cybersecurity services, while streamlining costs for information security management and operations. In addition, our monthly service reports reduce the time your IT team spends tracking, managing, and auditing network, application, and data security environments.

## Leverage Our Compliance

At BriteSky, we constantly adopt and evaluate ourselves against industry best practices and certifications. All of our staff have Government of Canada Secret (Level II) clearance. In addition, our cybersecurity products and solutions adhere to the following certifications and accreditations which are renewed annually:

- SOC 2 Type 2
- ISO 27001: 2013
- ISO 27017 and ISO 27018
- SAP cloud and infrastructure operations
- ITSG-33 Protected B Cloud Assessment completed by the Canadian Center for Cyber Security (CCCS) and Communications Security Establishment (CSE)

Our managed cybersecurity services provide Canadian enterprises with data residency and data sovereignty. All data, including security logs, events, and remediation actions, remains on Canadian soil, managed from a state-of-the-art security network operations center in Ottawa.

BriteSky is Canadian-owned and -operated. We will never copy, review, or mine your corporate data or IP for any purpose. All data rights and controls remain property of your organization.

## Rely on Field-Proven Expertise

BriteSky Cybersecurity products and solutions leverage our decades of real-world experience designing, building, delivering, and supporting custom cybersecurity solutions for leading enterprises, governments, and banking institutions across Canada.

Our highly skilled engineers have extensive expertise in cybersecurity, networking, cloud, and data center technologies. They incorporate only best-of-breed hardware and software from leading vendors.
