BRITESKY RECOVER
Disaster Recovery as a Service

Disaster can strike at any time. Keeping your cloud applications and data fully protected and recoverable at all times can be distracting, time-consuming, and expensive.

BriteSky Recover protects your cloud applications and data in case of a natural or human-caused disaster. You have a fully customizable Disaster Recovery as a Service (DRaaS) solution that enables full, time-specific recovery of critical data in the cloud and provides access to virtual machine computing when you need it.

Optimize Disaster Planning

With BriteSky Recover, your business data and applications are connected to a private, public, or hybrid cloud for backup rather than an on-premises IT server. Your data and applications are safe and secure at all times.

We take care of all disaster planning requirements, as well as maintenance and management of all systems. This eliminates the need for on-site and off-site disaster recovery systems. It also eliminates the time and costs required to provision, configure, test, and manage an effective disaster recovery plan.

If disaster strikes, BriteSky Recover provides immediate virtual computing capabilities for all your applications, as well as direct access to all your data. In most cases, this allows you to continue operating until your IT team can repair your on-premises systems.

Customize Cloud-Based Disaster Recovery

BriteSky Recover offers virtually unlimited flexibility and scalability to support any disaster recovery requirements.

You can choose the features and functions you need to create a custom virtual data vault that meets your unique business needs. Once configured, you have a secure disaster recovery environment that functions like a private cloud to reduce the risk of security breaches.

Protect All Your Cloud Data and Applications

Get the peace of mind that comes from complete, cloud-based data and application protection:

- Eliminate the time and costs associated with provisioning, configuring, testing, and managing on- and off-site disaster recovery systems.

- Create a custom disaster recovery plan that leverages the most advanced cloud networking hardware and software available.

- Maintain complete control over your data, applications, and disaster recovery environment at all times.

Build as You Grow

The unprecedented levels of flexibility and security offered in BriteSky Recover are enabled by the unique, layered Portable On-Demand Data Center (PODD) architecture in our BriteSky Core solution.

BriteSky Core is engineered from the ground up to grow with you. You can use BriteSky Recover on its own, or combine it with any of our other managed cloud services today or in the future:

- **BriteSky Preserve** for Storage as a Service (SaaS) and Backup as a Service (BaaS)
- **BriteSky Protect** for Firewall as a Service (FWaaS)
- **BriteSky Reside** for Infrastructure as a Service (IaaS)

For maximum protection, you can also combine BriteSky Recover with customized **BriteSky Cybersecurity** products and solutions to create a high-security enterprise cloud environment.

Leverage Our Compliance

At BriteSky, we constantly adopt and evaluate ourselves against industry best practices and certifications. All of our staff have Government of Canada Secret (Level II) clearance. In addition, our cloud products and solutions adhere to the following certifications and accreditations which are renewed annually:

- SOC 2 Type 2
- ISO 27001: 2013
- ISO 27017 and ISO 27018
- SAP cloud and infrastructure operations
- ITSG-33 Protected B Cloud Assessment completed by the Canadian Center for Cyber Security (CCCS) and Communications Security Establishment (CSE)

Our managed cloud services provide Canadian enterprises with data residency and data sovereignty. All data, including security logs, events, and remediation actions, remains on Canadian soil, managed from a state-of-the-art security network operations center in Ottawa.

BriteSky is Canadian-owned and -operated. We will never copy, review, or mine your corporate data or IP for any purpose. All data rights and controls remain property of your organization.

Rely on Field-Proven Expertise

BriteSky Recover leverages our decades of real-world experience designing, building, and delivering custom cloud solutions for leading enterprises, governments, and banking institutions across Canada.

Our highly skilled engineers have extensive expertise in data center technologies. They incorporate only best-of-breed hardware and software from leading vendors into our solutions.
