

BRITESKY RESIDE Infrastructure as a Service

To stay one step ahead of the market, your business needs a network infrastructure and applications that help your employees move faster and work more efficiently. Deploying and managing all of the computing resources needed to support business-critical applications can be expensive and time-consuming. Scaling those resources is even more challenging.

BriteSky Reside provides on-demand access to virtual cloud computing resources for all of your business applications. You have a fully customizable Infrastructure as a Service (IaaS) solution that increases business agility and dramatically reduces internal IT requirements.

Leverage the Full Potential of a Virtual IT Infrastructure

Eliminate the capital and operating costs associated with buying, deploying, and managing traditional on-premises networks and applications:

- Create a secure, virtual cloud computing environment that's customized for your business-critical applications.
- Maintain complete control over all virtual infrastructure and applications, as well as all active, passive, and unstructured data.
- Scale virtual infrastructure resources to keep pace with growth and take advantage of more sophisticated business applications.

Optimize Network and Application Resources

With BriteSky Reside, you can move away from yesterday's restrictive, on-premises computing options to take full advantage of cloud-based, virtual computing.

All your business-critical applications are hosted in a secure, scalable BriteSky cloud. Our networking and data center experts:

- Configure all computing resources
- Enable application access
- Provide ongoing maintenance
- Plan backup and resiliency tactics

This cloud-based approach provides the latest technology without the costs of maintenance or upgrades. It also drastically reduces the time and effort needed to configure, manage, and maintain networking and application resources.

Create a Custom Cloud Environment

BriteSky Reside ensures you retain complete control of all your data, applications, and virtual infrastructure at all times. You can customize the service to fit your immediate needs. You can also scale your cloud infrastructure environment to keep pace with business growth.

Once configured, you have a secure environment that functions like an on-premises network to provide the highest levels of security for all your data and applications.

Take full advantage of cloud-based, virtual computing with unprecedented levels of flexibility and security.

Build as You Grow

The unprecedented levels of flexibility and security offered in BriteSky Reside are enabled by the unique, layered Portable On-Demand Data Center (PODD) architecture in our BriteSky Core solution.

BriteSky Core is engineered from the ground up to grow with you. You can use BriteSky Reside on its own, or combine it with any of our other managed cloud services today or in the future:

- **BriteSky Preserve** for Storage as a Service (SaaS) and Backup as a Service (BaaS)
- **BriteSky Protect** for Firewall as a Service (FWaaS)
- **BriteSky Recover** for Disaster Recovery as a Service (DRaaS)

For maximum protection, you can also combine BriteSky Reside with customized **BriteSky Cybersecurity** products and solutions to create a high-security enterprise cloud environment.

Leverage Our Compliance

At BriteSky, we constantly adopt and evaluate ourselves against industry best practices and certifications. All of our staff have Government of Canada Secret (Level II) clearance. In addition, our cloud products and solutions adhere to the following certifications and accreditations which are renewed annually:

- SOC 2 Type 2
- ISO 27001: 2013
- ISO 27017 and ISO 27018
- SAP cloud and infrastructure operations
- ITSG-33 Protected B Cloud Assessment completed by the Canadian Center for Cyber Security (CCCS) and Communications Security Establishment (CSE)

Our managed cloud services provide Canadian enterprises with data residency and data sovereignty. All data, including security logs, events, and remediation actions, remains on Canadian soil, managed from a state-of-the-art security network operations center in Ottawa.

BriteSky is Canadian-owned and -operated. We will never copy, review, or mine your corporate data or IP for any purpose. All data rights and controls remain property of your organization.

Rely on Field-Proven Expertise

BriteSky Reside leverages our decades of real-world experience designing, building, and delivering custom cloud solutions for leading enterprises, governments, and banking institutions across Canada. Our highly skilled engineers have extensive expertise in data center technologies. They incorporate only best-of-breed hardware and software from leading vendors into our solutions.
