BRITESKY RESPOND
Security, Orchestration, and Automated Response

As the number and severity levels of cyberthreats continue to increase, many enterprises are recognizing the value that automated response services provide.

BriteSky Respond simplifies and accelerates your security operations to reduce risks. You have a fully customizable Security, Orchestration, and Automated Response (SOAR) solution that improves security workflows, automates responses to threats, and reduces internal IT workloads.

Streamline Security Operations

Take your security processes and tasks to higher levels of accuracy and efficiency while reducing the burden on internal IT teams:

- Minimize overhead by eliminating the initial triage tasks on potential threats and presenting all artifacts in a single pane.
- Automate repeatable actions to save cycles for more in-depth analysis of security threats.
- Reserve human governance for critical oversight tasks to increase the consistency of remediation actions.
- Continuously improve your playbook throughout the life cycle of your SOAR services to further increase efficiency, reduce cycles, and free up IT personnel for other tasks.

Standardize Security Response Processes

Reduce the security risks that inevitably occur when your organization is scrambling to keep up with the flood of ever-changing cyberthreats.

With BriteSky Respond, you can adopt consistent, methodical, and repeatable approaches to threat identification, investigation, and remediation. At the same time, you have complete flexibility to customize all activities for your unique security requirements:

- Tailor workflows and processes to match specific threat profiles, industry requirements, or security maturity goals.
- Choose the optimal balance of automated and human-managed tasks to enhance your security posture.
- Evolve to completely automated remediation when the time is right.
- Use playbooks to automate tasks, such as remediation actions on network appliances and systems.

Simplify Your Transition to Managed Security

We make your move to BriteSky Respond as simple and seamless as possible.

We conduct a current situation analysis (CSA) and provide detailed recommendations, you choose the options that suit your operations, then we work with your IT team to integrate the customized SOAR solution.

Add New Cybersecurity Services on Demand

You can use BriteSky Respond on its own, or combine it with any of our other managed cybersecurity services today, or in the future, through BriteSky Fortress.

BriteSky Fortress is a unique, modular solution that can be rapidly deployed through a single BriteSky Lightweight Appliance (BLA). To complement BriteSky Respond, you can choose:

- **BriteSky Detect** for endpoint telemetry
- **BriteSky Indicate** for threat intelligence
- **BriteSky Protect** for managed firewall services
- **BriteSky Recon** for vulnerability management
- **BriteSky Surveil** for managed Security Information and Event Management (SIEM) on premises or in the cloud for SIEM as a Service (SIEMaaS)

You can also combine BriteSky Respond with our customized **BriteSky Cloud** products and solutions to create a high-security enterprise cloud environment.

Leverage Our Compliance

At BriteSky, we constantly adopt and evaluate ourselves against industry best practices and certifications. All of our staff have Government of Canada Secret (Level II) clearance. In addition, our cybersecurity products and solutions adhere to the following certifications and accreditations which are renewed annually:

- SOC 2 Type 2
- ISO 27001: 2013
- ISO 27017 and ISO 27018
- SAP cloud and infrastructure operations
- ITSG-33 Protected B Cloud Assessment completed by the Canadian Center for Cyber Security (CCCS) and Communications Security Establishment (CSE)

Our managed cybersecurity services provide Canadian enterprises with data residency and data sovereignty. All data, including security logs, events, and remediation actions, remains on Canadian soil, managed from a state-of-the-art security network operations center in Ottawa.

BriteSky is Canadian-owned and -operated. We will never copy, review, or mine your corporate data or IP for any purpose. All data rights and controls remain property of your organization.

Rely on Field-Proven Expertise

BriteSky Respond leverages our decades of real-world experience designing, building, delivering, and supporting custom cybersecurity solutions for leading enterprises, governments, and banking institutions across Canada.

Our highly skilled engineers have extensive expertise in cybersecurity, networking, cloud, and data center technologies. They incorporate only best-of-breed hardware and software from leading vendors into our solutions.
