

BRITESKY SURVEIL

Security Information and Event Management

With the volume and sophistication of cyberattacks increasing by the second, keeping your network, applications, and data secure is a time- and resource-intensive effort.

BriteSky Surveil dramatically simplifies network and data security monitoring. You have a fully customizable Security Information and Event Management (SIEM) solution that delivers actionable security intelligence.

For maximum flexibility, we can provide managed SIEM on premises or in the cloud for SIEM as a Service (SIEMaaS).

Upgrade to Advanced Security Management

Optimize network and data security with real-time monitoring based on the latest security standards and frameworks:

- Reduce capital, operating, management, training, and support costs associated with on-site SIEM processes and systems.
- Focus in-house IT security efforts on in-depth analysis of event logs, consolidated reports, priority alerts, and detailed recommendations.
- Keep pace with rapid changes in cybersecurity threats.

Create a Custom Security Management System

BriteSky Surveil provides three levels of real-time, rules-based monitoring, analysis, and reporting. For maximum flexibility, services can be customized for your network, data, and application operating environment. In addition, you can easily add monitoring, reports, and intelligence feeds, as needed.

BriteSky Surveil Service Levels					
Service Level	Monitored Security Rules	Events Per Second (EPS)	Monthly Reports	Monitoring Level	Optional Additional Services
Tier 1	5	500	5	24/7/365	Standard threat intelligence feeds
Tier 2	5	1,000	5	24/7/365	Standard threat intelligence feeds
Tier 3	5	1,500	5	24/7/365	Standard threat intelligence feeds

Maximize Network Protection

BriteSky Surveil includes a powerful event logger that streamlines and consolidates all logs, then securely delivers them to analysts in the BriteSky Defensive Cyber Operations (DCO) Center. For maximum oversight, BriteSky Surveil continues collecting logs for up to 72 hours after internet outages, delivering them to the DCO Center when service is restored.

Go Beyond Monitoring

All BriteSky Surveil incident reports include actionable recommendations for enhancing and optimizing network security systems. This makes it easier for your IT team to reduce the potential for brute-force attacks, denial-of-service attacks, malware exploitation, phishing attempts, and other common cyberthreats.

*Monitor your
network and
data in
real time.*

Add New Cybersecurity Services on Demand

You can use BriteSky Surveil on its own, or combine it with any of our other managed cybersecurity services today, or in the future, through BriteSky Fortress.

BriteSky Fortress is a unique, modular solution that can be rapidly deployed through a single BriteSky Lightweight Appliance (BLA). To complement BriteSky Surveil, you can choose:

- **BriteSky Detect** for endpoint telemetry
- **BriteSky Indicate** for threat intelligence
- **BriteSky Protect** for managed firewall services
- **BriteSky Recon** for vulnerability management
- **BriteSky Respond** for Security, Orchestration, and Automated Response (SOAR)

You can also combine BriteSky Surveil with our customized **BriteSky Cloud** products and solutions to create a high-security enterprise cloud environment.

Leverage Our Compliance

At BriteSky, we constantly adopt and evaluate ourselves against industry best practices and certifications. All of our staff have Government of Canada Secret (Level II) clearance. In addition, our cybersecurity products and solutions adhere to the following certifications and accreditations which are renewed annually:

- SOC 2 Type 2
- ISO 27001: 2013
- ISO 27017 and ISO 27018
- SAP cloud and infrastructure operations
- ITSG-33 Protected B Cloud Assessment completed by the Canadian Center for Cyber Security (CCCS) and Communications Security Establishment (CSE)

Our managed cybersecurity services provide Canadian enterprises with data residency and data sovereignty. All data, including security logs, events, and remediation actions, remains on Canadian soil, managed from a state-of-the-art security network operations center in Ottawa.

BriteSky is Canadian-owned and -operated. We will never copy, review, or mine your corporate data or IP for any purpose. All data rights and controls remain property of your organization.

Rely on Field-Proven Expertise

BriteSky Surveil leverages our decades of real-world experience designing, building, delivering, and supporting custom cybersecurity solutions for leading enterprises, governments, and banking institutions across Canada. Our highly skilled engineers have extensive expertise in cybersecurity, networking, cloud, and data center technologies. They incorporate only best-of-breed hardware and software from leading vendors into our solutions.
