

SIMPLIFY YOUR MOVE TO A SECURE CLOUD

BriteSky Cloud makes it easy for Canadian businesses to store, manage, and share large volumes of data with complete peace of mind.

We provide the virtual data vault, you choose the options that suit your business, then we work with your IT team to manage your migration and maintain your highly secure, virtual data environment.

Your data remains in Canada at all times and you maintain full control over every aspect of your active, passive, and unstructured data.

Customize Your Cloud

Our flexible and integrated approach supports a variety of managed services, including:

- **BriteSky Preserve** for Storage as a Service (SaaS) and Backup as a Service (BaaS)
- **BriteSky Protect** for Firewall as a Service (FWaaS)
- **BriteSky Recover** for Disaster Recovery as a Service (DRaaS)
- **BriteSky Reside** for Infrastructure as a Service (IaaS)
- **BriteSky Share** for secure file sharing

Find New Agility in the Cloud

BriteSky Cloud products and solutions are not generic, one-size-fits-all offerings. They are purpose-built for medium to large enterprises and fully customized to meet your unique business requirements — whether you need a public, private, or hybrid cloud environment.

You're not locked into any hardware or software platform. This flexibility means you can easily adapt to emerging markets. You can also scale IT services in real time to roll out new offerings that meet specific marketing or sales requirements.

Build as You Grow

BriteSky Core is at the center of our cloud offerings. This turnkey, modular solution is built using our unique, layered Portable On-Demand Data Center (PODD) architecture. It is engineered from the ground up for business agility and growth.

With BriteSky Core, you have a virtual data vault that provides nearly unlimited room to expand. You can choose the mix of secure cloud features and functions your business needs today, then easily scale to adopt additional capabilities over time as your business evolves and data volumes increase.

You can also choose any of our managed cloud services as a standalone product. In addition, you can easily combine our cloud offerings with customized **BriteSky Cybersecurity** products and solutions to create a high-security enterprise cloud environment that reduces the risk of security breaches.

With BriteSky Cloud, your IT personnel can focus on managing on-site IT business requirements instead of infrastructure.

Reduce Data Storage and IT Costs

Your move to BriteSky Cloud eliminates a number of capital and operating expenses. You no longer have to build and manage physical data storage solutions or a dedicated cloud environment.

There is no infrastructure to buy, no storage facilities to operate, no staff to train. All of our enterprise cloud solutions are built on a clear and predictable pricing model based on features and functions. This approach removes the uncertainty associated with generic cloud solutions that are based on complex, unpredictable pricing strategies.

With BriteSky Cloud, your IT personnel can focus on managing on-site IT business requirements instead of infrastructure. You can free up funds for other business activities.

Leverage Our Compliance

At BriteSky, we constantly adopt and evaluate ourselves against industry best practices and certifications. All of our staff have Government of Canada clearance. In addition, our cloud products and solutions adhere to the following certifications and accreditations which are renewed annually:

- SOC 2 Type 2
- ISO 27001: 2013
- ISO 27017 and ISO 27018
- SAP cloud and infrastructure operations
- ITSG-33 Protected B Cloud Assessment completed by the Canadian Center for Cyber Security (CCCS) and Communications Security Establishment (CSE)

Our managed cloud services provide Canadian enterprises with data residency and data sovereignty. All data, including security logs, events, and remediation actions, remains on Canadian soil, managed from a state-of-the-art security network operations center in Ottawa.

BriteSky is Canadian-owned and -operated. We will never copy, review, or mine your corporate data or IP for any purpose. All data rights and controls remain property of your organization.

Rely on Field-Proven Expertise

BriteSky Cloud products and solutions leverage our decades of real-world experience designing, building, and delivering custom cloud solutions for leading enterprises, governments, and banking institutions across Canada.

Our highly skilled engineers have extensive expertise in data center technologies. They incorporate only best-of-breed hardware and software from leading vendors into our solutions.
