BRITESKY PRESERVE
Data Storage and Backup as Services

Your data is a critical business asset. It's the foundation for all your interactions with customers, partners, and suppliers. It also provides a historical record of business activities to inform your strategic and operational decisions.

BriteSky Preserve reduces the risks, costs, and processes associated with traditional physical backup and storage options. You have a fully customizable Storage as a Service (SaaS) and Backup as a Service (BaaS) solution that protects all your critical data.

Optimize Data Backups

With BriteSky Preserve, your business IT systems are connected to a private, public, or hybrid cloud for data backup rather than an on-premises IT server. This eliminates the need for physical storage solutions, as well as the management, scalability, and cost issues associated with physical storage.

Your data remains secure at all times. We take care of all data maintenance and management tasks, including upgrades and data recovery. You retain complete control of all backup options.

Tailor Cloud Storage

You have virtually unlimited flexibility and scalability to customize BriteSky Preserve for your unique data storage requirements. Once configured, you have a secure storage environment that functions like a private cloud to reduce the risk of security breaches.

Streamline Your Transition to the Cloud

We make your move to cloud backup and storage as simple and seamless as possible.

We provide the virtual data vault, you choose the options that suit your business, then we work with your IT, compliance, and legal teams to manage your migration. If your business is still using older, legacy tapes for backups, we can migrate that data as well.

Move to Flexible, Cloud-Based Backup and Storage

Customize BriteSky Preserve to meet your unique business requirements today and tomorrow:

- Create a secure, virtual data vault that's specifically designed for cloud-based data storage.

- Maintain complete control over all of your active, passive, and unstructured data at all times to improve business processes, increase competitiveness, and meet compliance requirements.

- Quickly and easily access additional backup and storage resources to support ever-increasing volumes of business data.

Virtually unlimited flexibility and scalability to customize BriteSky Preserve.

Build as You Grow

The unprecedented levels of flexibility and security offered in BriteSky Preserve are enabled by the unique, layered Portable On-Demand Data Center (PODD) architecture in our BriteSky Core solution.

BriteSky Core is engineered from the ground up to grow with you. You can use BriteSky Preserve on its own, or combine it with any of our other managed cloud services today or in the future:

- **BriteSky Protect** for Firewall as a Service (FWaaS)
- **BriteSky Recover** for Disaster Recovery as a Service (DRaaS)
- **BriteSky Reside** for Infrastructure as a Service (IaaS)
- **BriteSky Share** for secure file sharing

For maximum protection, you can also combine BriteSky Preserve with customized **BriteSky Cybersecurity** products and solutions to create a high-security enterprise cloud environment.

Leverage Our Compliance

At BriteSky, we constantly adopt and evaluate ourselves against industry best practices and certifications. All of our staff have Government of Canada clearance. In addition, our cloud products and solutions adhere to the following certifications and accreditations which are renewed annually:

- SOC 2 Type 2
- ISO 27001: 2013
- ISO 27017 and ISO 27018
- SAP cloud and infrastructure operations
- ITSG-33 Protected B Cloud Assessment completed by the Canadian Center for Cyber Security (CCCS) and Communications Security Establishment (CSE)

Our managed cloud services provide Canadian enterprises with data residency and data sovereignty. All data, including security logs, events, and remediation actions, remains on Canadian soil, managed from a state-of-the-art security network operations center in Ottawa.
