

BRITE SKY PROTECT

Firewall as a Service

Your cloud network firewall is the first line of defense against cyberattacks. However, continuously evolving threats and the unwavering persistence of attackers make it difficult to ensure your firewall is always ready to protect your network.

BriteSky Protect eliminates the challenges of cloud firewall management and maintenance. You have a fully customizable Firewall as a Service (FWaaS) solution that provides complete, cost-effective protection from cyberattacks and network intrusions.

Customize Network Edge Protection

BriteSky Protect integrates easily with your enterprise cloud environment as well as on-premises and external networks. It includes a complete set of managed firewall services, including:

- Network security analysis and recommendations
- Firewall deployment and integration (if needed)
- Ongoing management and maintenance of firewall appliances
- 24/7 traffic monitoring and analysis
- Regular firmware upgrades and patch management
- Weekly signature monitoring and management
- Five standard configuration changes per month

Rest Assured Your Network Is Always Protected

BriteSky Protect includes a powerful event logger that streamlines and consolidates all logs and delivers them to analysts in the BriteSky Defensive Cyber Operations (DCO) Center over a secure virtual private network (VPN) connection.

For maximum oversight, BriteSky Protect continues collecting logs for up to 72 hours after internet outages and delivers them to the BriteSky DCO when service is restored. BriteSky network security experts can remotely access the firewall to securely program automated configuration changes and protection upgrades based on consolidated event logs.

Optimize Firewall Management

Protect your cloud network and data with an advanced managed firewall offering:

- Integrate firewall protection that continuously adapts to changing threat profiles.
- Reduce capital, operating, management, training, and support costs associated with managing and maintaining advanced firewall protection systems.
- Quickly and easily add additional firewalls to protect your central network and branch locations.

Streamline Your Transition to Managed Firewall Services

We make your move to BriteSky Protect as simple and seamless as possible.

We conduct an in-depth network security analysis and provide detailed recommendations, you choose the options that suit your operations, and we work with your IT team to integrate the customized FWaaS solution.

Build as You Grow

The unprecedented levels of flexibility and security offered in BriteSky Protect are enabled by the unique, layered Portable On-Demand Data Center (PODD) architecture in our BriteSky Core solution.

BriteSky Core is engineered from the ground up to grow with you. You can use BriteSky Protect on its own, or combine it with any of our other managed cloud services today or in the future. You can choose:

- **BriteSky Preserve** for Storage as a Service (SaaS) and Backup as a Service (BaaS)
- **BriteSky Recover** for Disaster Recovery as a Service (DRaaS)
- **BriteSky Reside** for Infrastructure as a Service (IaaS)
- **BriteSky Share** for secure file sharing

For maximum protection, you can also combine BriteSky Protect with customized **BriteSky Cybersecurity** products and solutions to create a high-security enterprise cloud environment.

Leverage Our Compliance

At BriteSky, we constantly adopt and evaluate ourselves against industry best practices and certifications. All of our staff have Government of Canada clearance. In addition, our cloud products and solutions adhere to the following certifications and accreditations which are renewed annually:

- SOC 2 Type 2
- ISO 27001: 2013
- ISO 27017 and ISO 27018
- SAP cloud and infrastructure operations
- ITSG-33 Protected B Cloud Assessment completed by the Canadian Center for Cyber Security (CCCS) and Communications Security Establishment (CSE)

Our managed cloud services provide Canadian enterprises with data residency and data sovereignty. All data, including security logs, events, and remediation actions, remains on Canadian soil, managed from a state-of-the-art security

network operations center in Ottawa.

BriteSky is Canadian-owned and -operated. We will never copy, review, or mine your corporate data or IP for any purpose. All data rights and controls remain property of your organization.

Rely on Field-Proven Expertise

BriteSky Protect leverages our decades of real-world experience designing, building, and delivering custom cloud solutions for leading enterprises, governments, and banking institutions across Canada.

Our highly skilled and dedicated engineers have extensive real-world data center experience and incorporate only best-of-breed hardware and software from leading vendors.
